Maintenance of ALUZION Products

ALUZION Siding products require minimum maintenance. However, to maintain the validity of this warranty and to enjoy the longest possible service life from your siding, you must keep it reasonably free from surface contaminants. Remove surface contaminants by washing walls annually, with a soft cloth or soft brush and mild household detergents. Do not use chemical cleaners such as degreasers, solutions containing >5% Trisodium Phosphate and at no time should solutions utilizing chlorines/ammonias or abrasives be used. To prevent shiny spots, don't press too hard and to minimize streaking, wash walls from the top down. After washing, use copious amounts of water to rinse away all traces of detergent. Do not use pressure washing equipment, nor direct water spray toward vented soffits.

The warranty is not valid unless warranty registered with ALUZION INC. and warranty number assigned.
