STEEL

ENVIRONMENTALLY RESPONSIBLE

- **Eco-Conscious Materials:** Steel is the most recycled material on the planet—recycled more than all other materials combined—and can be reused repeatedly without loss of strength.
- **Energy-Saving Performance:** Klauer premium collections feature Cool Paint Technology™, using reflective pigments to help reduce heat absorption and improve energy efficiency.
- **Advanced Coating Process:** Our silicone-modified polyester paint systems are oven-baked during a continuous coil-coating process, resulting in a tougher, longer-lasting finish than vinyl, wood, or post-applied coated composite

WEATHER PROTECTED

Klauer's world-class coatings are built tough, resisting scratches, stains and the elements—while staying cleaner longer. Backed by industry-leading warranties, our proprietary finish repels water, oils and environmental exposure for lasting performance.

WARRANTY TOUGH

For added peace of mind, our steel siding collections are backed by a no-nonsense Limited Lifetime Warranty, including a 35-year limited chalk- and fade-resistance guarantee and a hail-protection warranty.

WORRY FREE

Klauer steel siding and accessories are virtually maintenance free—just an occasional rinse with a garden hose keeps your exterior looking clean and beautiful. You'll never need to paint or stain your home again.
